LCD Monitors Offer Simple Signage Solutions

SMARTBOX

Call: 1300 520 260 | website: smart-box.com.au

Smart-Box offers an effective and convenient solution for digital signage. Our 32" screens are designed for ease of use and exhibity in a variety of settings. Simple and stylish, they have the functionality to support easy content distribution. Whether in a retail, public, or other these monitors can help convey your message and make an eye-catching impression. So if you're seeking a multifaceted signage solution with round-the-clock reliability and easy content distribution, these affordable slimline monitors offer outstanding value.

The Quality to Present Attractive Signage

Excellent Image Quality

Full HD (1,920 × 1,080) resolution brings images to life with vivid, true-to-life details. Everything from thin lines to ne text to photographic images can be displayed in stunning clarity.

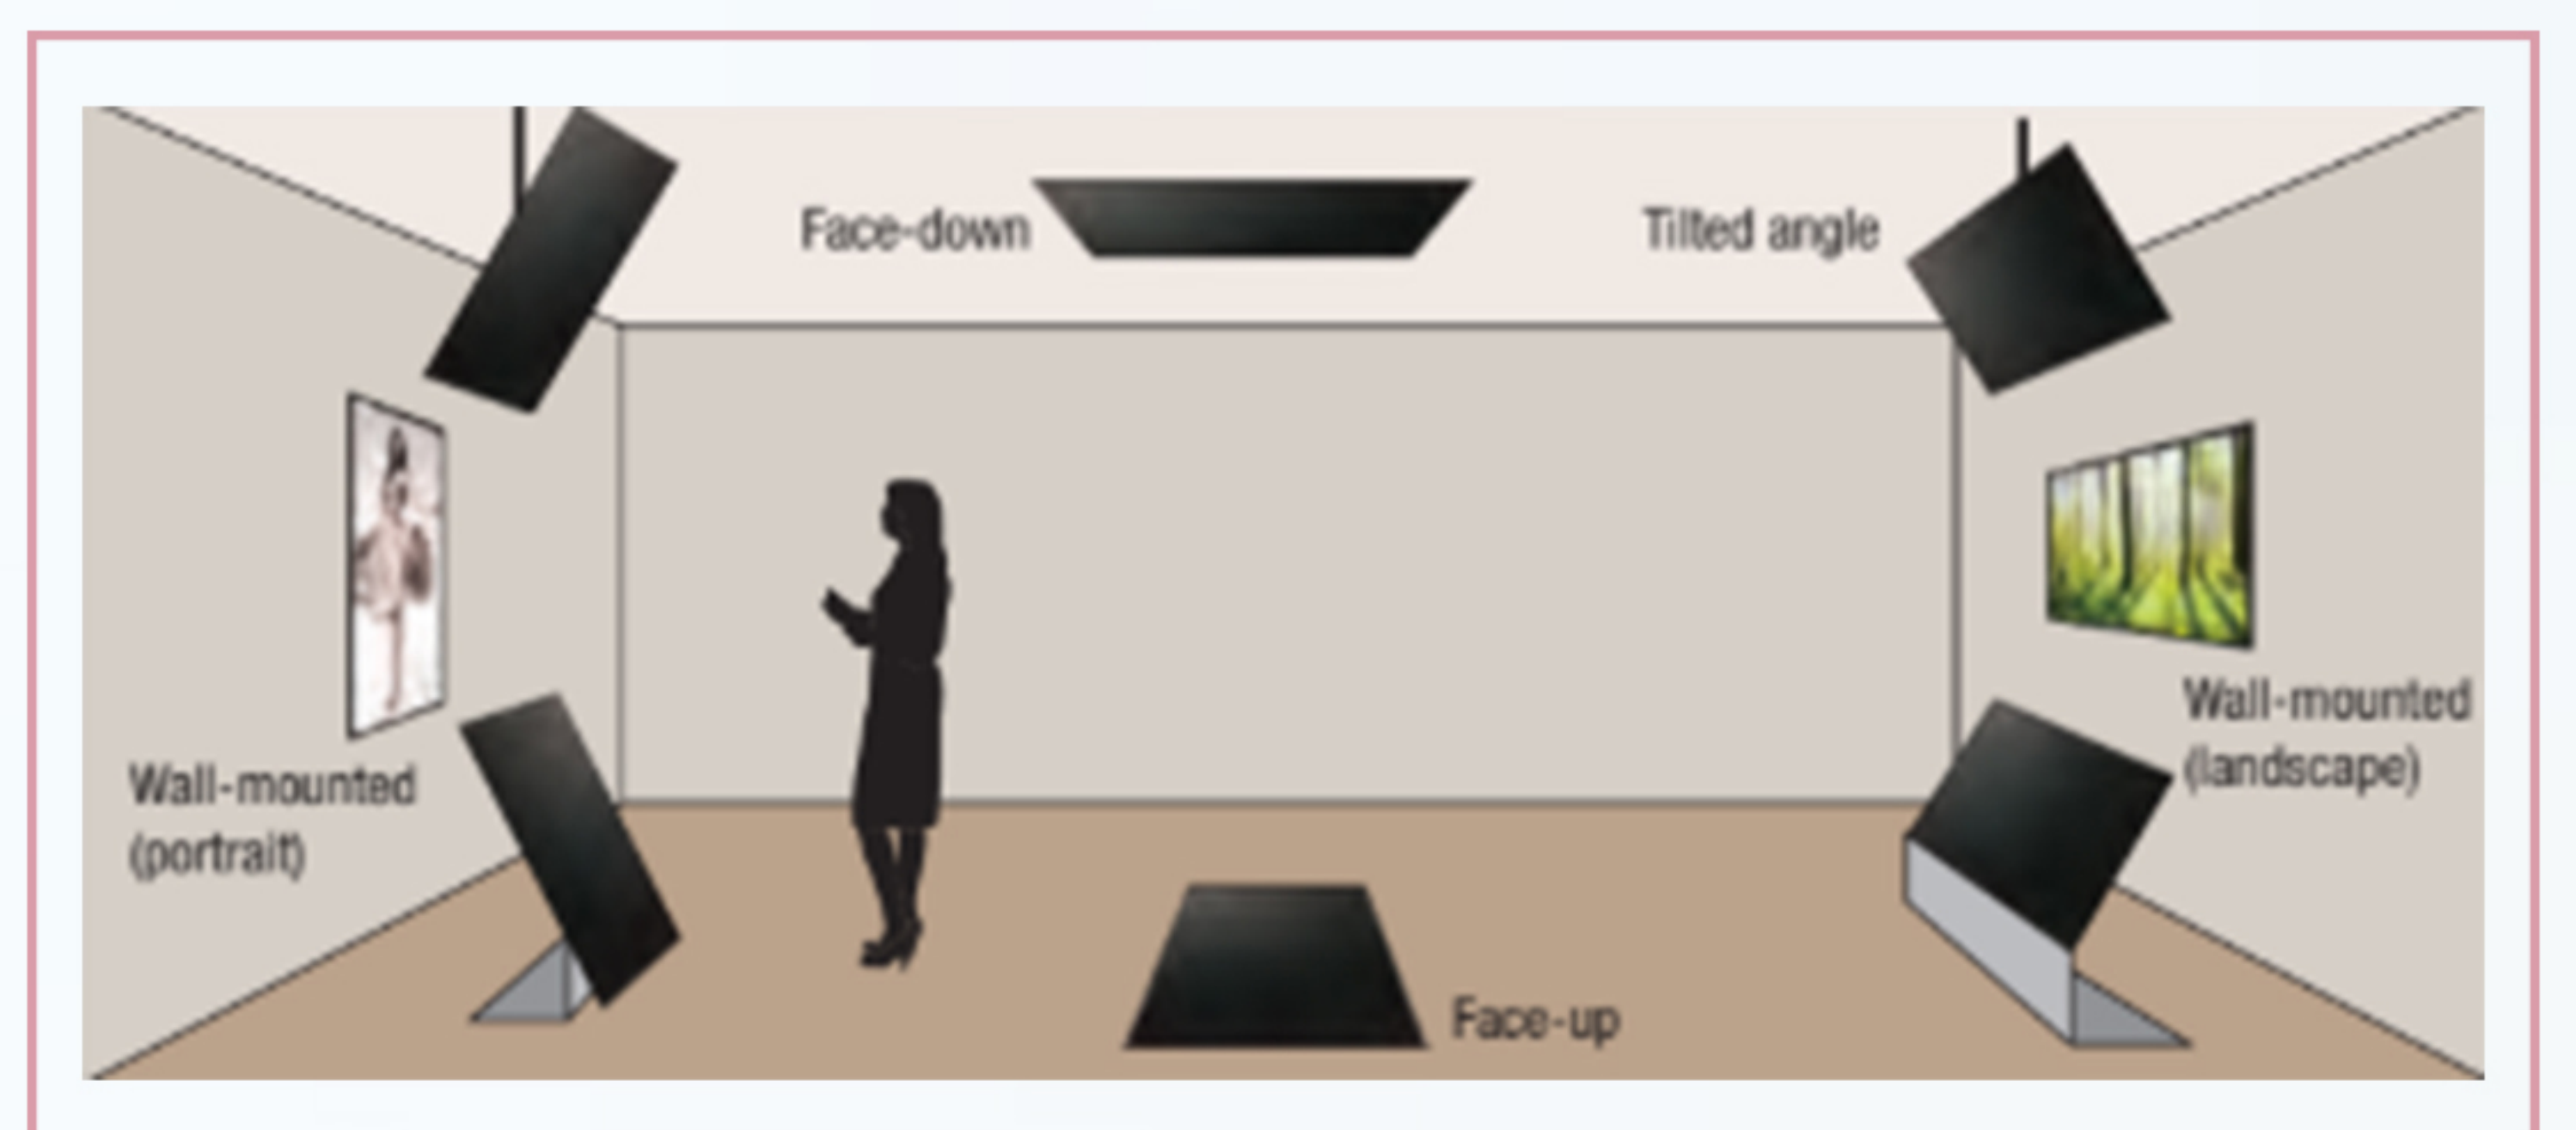

Simple and Stylish Design

A narrow 16 mms* bezel keeps the emphasis on on screen content, so that information is conveyed clearly and attractively. The simple and stylish design matches a variety of locations and business settings, from small shops to large corporations and industrial environments.

Adaptable to Various Settings

Whether in a landscape or portrait orientation, these monitors can be installed face up, face down, or tilted forward or backward at an angle of up to 90 degrees. Such exhibity helps you to incorporate the monitors into a wider-than-ever variety of settings.

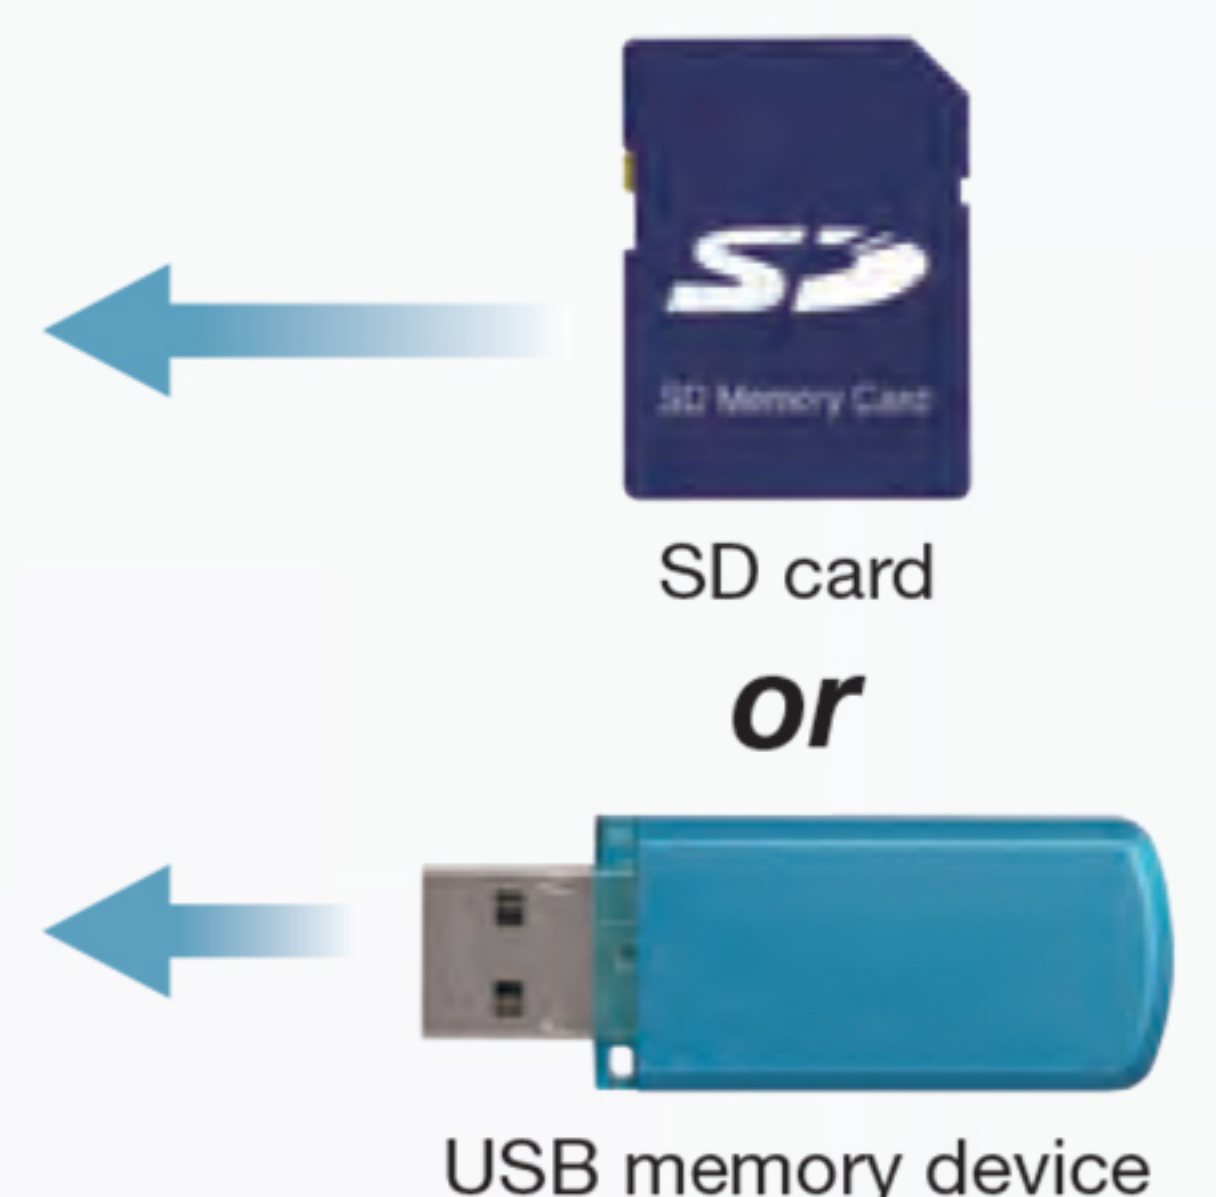

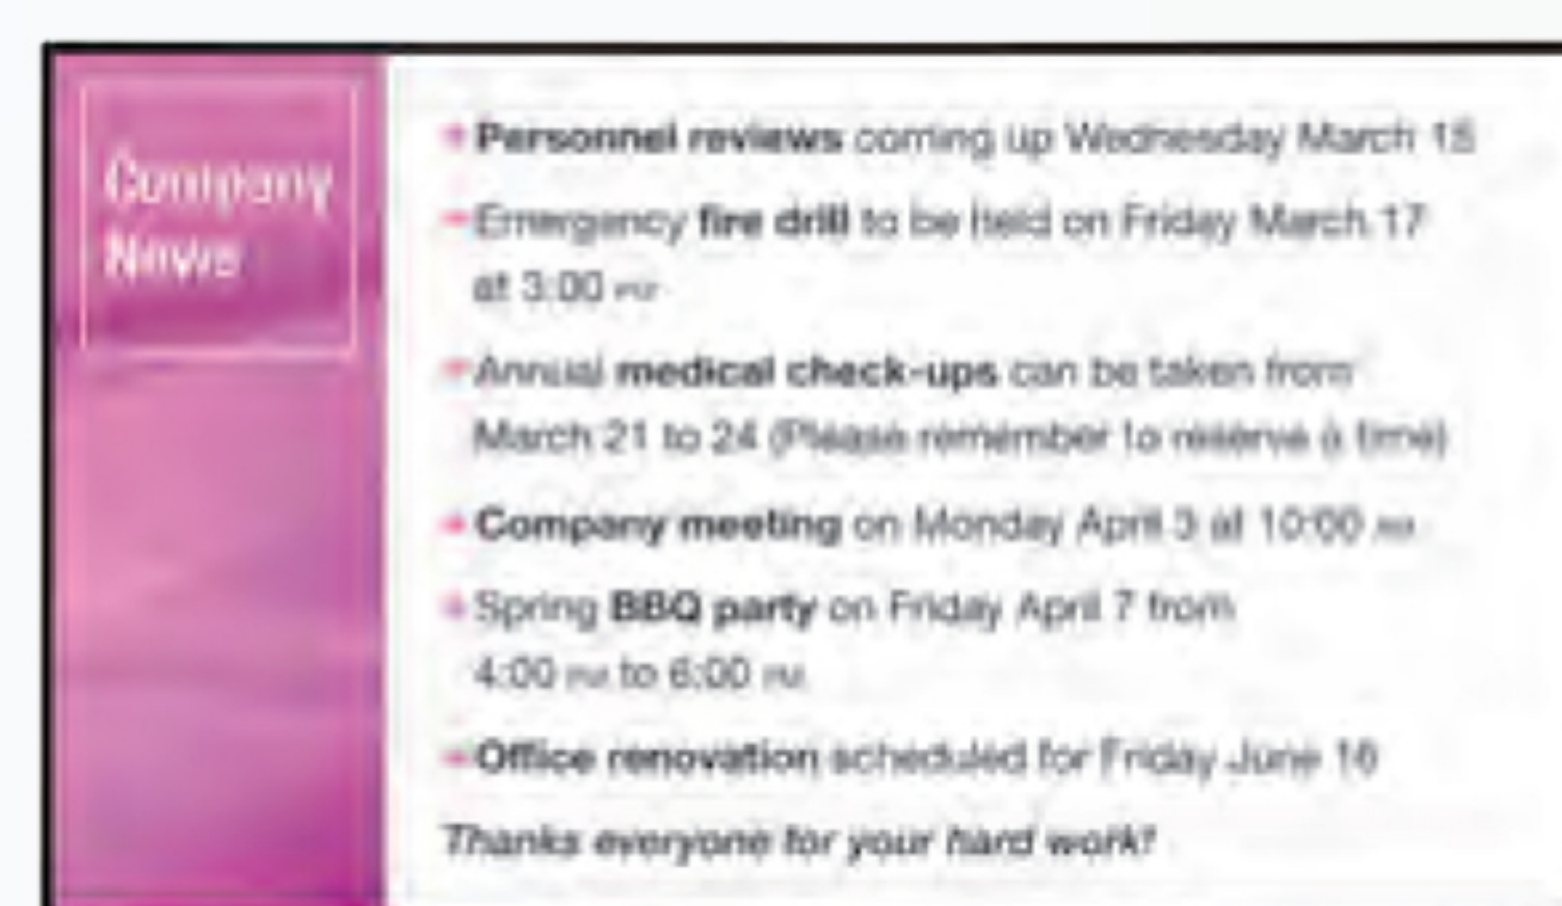

Easy and Versatile Signage Support

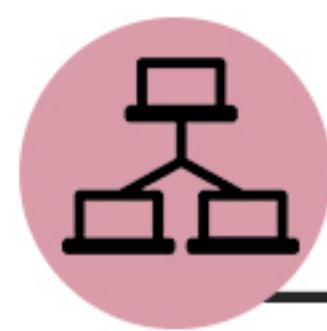

32" screens support easy daily usage and versatile content distribution. Simply insert a USB memory device or SD card for plug-and-play operation. Using a specified wireless SD card equipped with an original Smart HTML application, you can distribute content wirelessly from a PC or mobile device. Furthermore, the preloaded software supports convenient content distribution and management via network. Thanks to their versatile signage capabilities, these monitors make it easy to convey messages in public spaces or commercial locations, or promote internal communication in the office.

Autoplay via Media Player

Displaying still images or videos couldn't be easier. Just insert a USB memory device or SD card into the LCD monitor and the built-in media player starts playing your content right away. There's no need for a PC and cables. It's easy for anyone to operate.

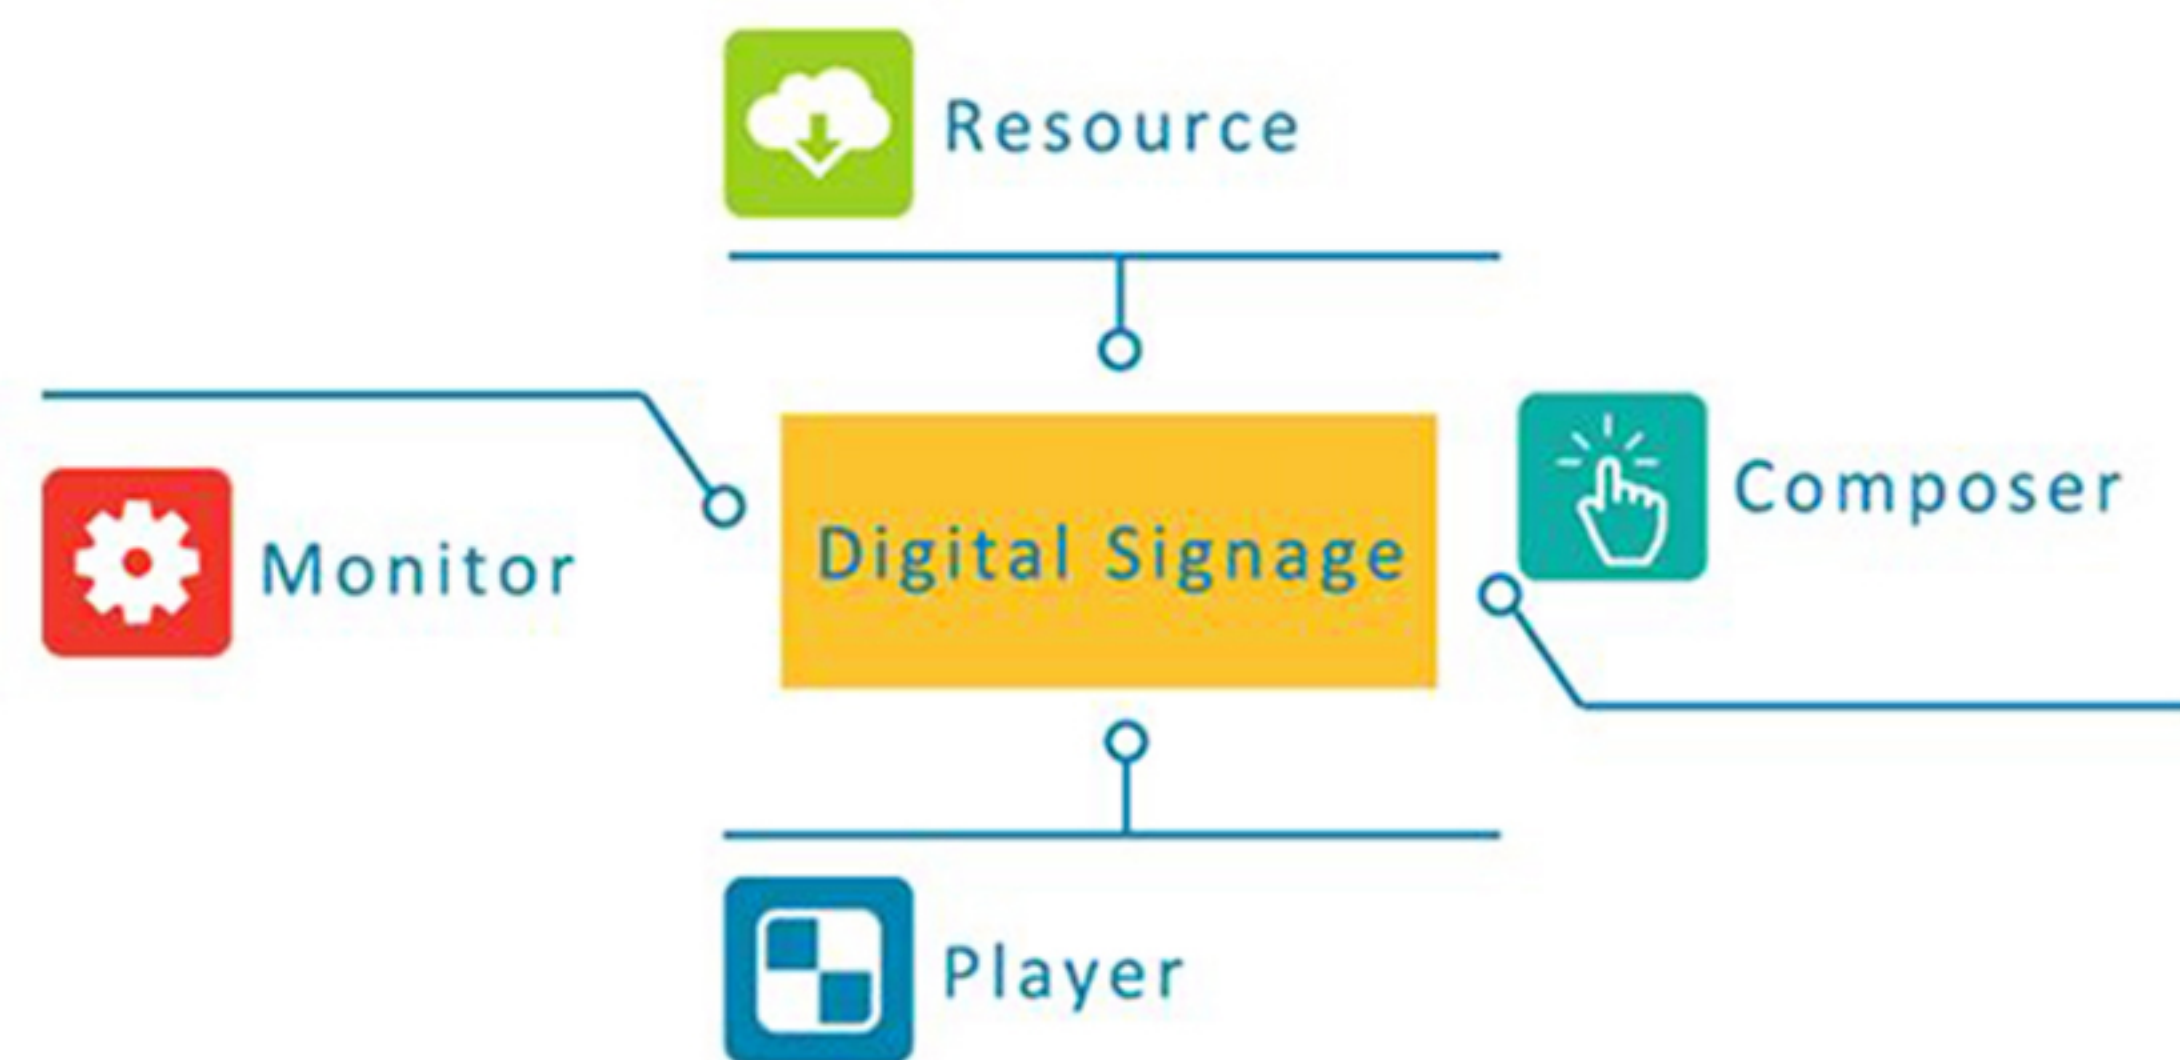

Easy Remote Programming

Our screens are fitted with a wi-fi module as well as a Sim card module . You can create your campaign from the back end software and run it straight away on the screen in one click . This includes features such as campaign and layout creation , media play schedule and loop , auto turn on/off . Full manageability and quick contents update .
